Degree: B.E - IT

2024_28_III_OOPS Using Java Lab

2028_REC_OOPS using Java_Week 2_Q8

Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

A bank generates secure codes using 3-digit numbers where each digit is unique, and the code must be divisible by 3. You are tasked with generating the first N such codes based on user input, ensuring the digits are unique and the number is divisible by 3.

Note: Use nested for loops to solve.

Input Format

The first line contains an integer N representing the number of valid codes to generate.

Output Format

The output prints N line,s each line contains a valid 3-digit code.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 5
Output: 102
105
108
120
123

Answer

```java
// You are using Java
import java.util.*;
class Bank{
    public static void main(String args[]){
        Scanner S=new Scanner(System.in);
        int a=S.nextInt(),c=0;
        for(int i=1;i<=9;i++){
            for(int j=0;j<=9;j++){
                if(j==1)
                    continue;
                for(int k=0;k<=9;k++){
                    if(k==j || k==i)
                        continue;
                    int x=i*100+j*10+k*1;
                    if(x%3==0){
                        System.out.println(x);
                        c++;
                    }
                    if(c==a)
                        return;
                }
            }
        }
    }
}
```

Status : Correct   ***Marks : 10/10***
